

ABSTRACT OF THE DISCLOSURE

An acupuncture needle container and dispenser to store and dispense a plurality of sterile acupuncture needles having a transparent top cover piece and an opaque colored bottom piece with a distal end, a proximal end and a middle portion. The transparent top cover piece fits over the opaque colored bottom piece and forms a semi-oval needle reservoir at the distal end, a cylindrical inserter at the proximal end and a channel formed between the semi-oval needle reservoir and the cylindrical inserter to allow for an individual channeled movement of the plurality of acupuncture needles from the semi-oval needle reservoir through the formed channel and into the cylindrical inserter.
